**Do you want beneficial technologies being shaped by your ideas? Whether in the areas of mobility solutions, consumer goods, industrial technology or energy and building technology – with us, you will have the chance to improve quality of life all across the globe. Welcome to Bosch.**

The Automotive Electronics (AE) division develops, produces and sells semiconductors, micro electromechanical systems, components and electronic control units as a leading provider for the automotive industry. Furthermore, we get involved with innovative drives for eBikes, sensors for entertainment electronics (e.g. smartphones or game consoles) as well as components for the Internet of Things and services. At the Bosch Development and Service Center Leonberg we work on modern automotive technology components and systems with complex software and hardware architectures. We develop e.g. innovative concepts for energy and communication on-board networks as well as vehicle infrastructure and auto body components.

### Your contribution to something big:

- Help shaping the future: You develop and integrate security functionality into a BodyComputer for hacker attack protection.
- Future-oriented design: You make technical decisions together with software architects, the security officer and the customer.
- Networked communication: You coordinate interfaces for security functions with the OEM, third party supplier and internally.
- Experience cooperation: You work in an international team with colleagues from e.g. Hungary, India, America and Asia.
- Conscientious coordination: You are the contact for your functionality requirements, design, configuration and change management, verification and validation (software module test and integration tests) and you coordinate with project managers, our customers, our security officer and development partners.

### What distinguishes you:

- Personality: intercultural open-minded, strong communication skills and flexible
- Working method: well organized, proactive and careful
- Experience: AUTOSAR software architecture and development, drivers, ADC reading
- Languages: very good English knowledge, German knowledge is a plus
- Education: Bsc/Msc in computer science or related field
