Start something big today. Apply now

Software Architect

Organization: Robert Bosch GmbH | Region: Deutschland | Location: Leonberg | Functional Area: Development, Software Development | Level: Professionally experienced | Date: 08.06.2018 | Link for Application: https://jobs.smartrecruiters.com/BoschGroup/743999671617657-software-architect

Do you want beneficial technologies being shaped by your ideas? Whether in the areas of mobility solutions, consumer goods, industrial technology or energy and building technology – with us, you will have the chance to improve quality of life all across the globe. Welcome to Bosch.

The Automotive Electronics (AE) division develops, produces and sells semiconductors, micro electromechanical systems, components and electronic control units as a leading provider for the automotive industry. Furthermore, we get involved with innovative drives for eBikes, sensors for entertainment electronics (e.g. smartphones or game consoles) as well as components for the Internet of Things and services. At the Bosch Development and Service Center Leonberg we work on modern automotive technology components and systems with complex software and hardware architectures. We develop e.g. innovative concepts for energy and communication on-board networks as well as vehicle infrastructure and auto body components.

Your contribution to something big:

- Help shaping the future: You develop the software reference architecture for Body Computers and gateways as a basis for future projects.
- Future-oriented design: You make technical decisions together with software architects, the security officer and the customer.
- Networked communication: You coordinate the AE-BE software reference architecture across all locations with North America, Australia and Budapest.
- Experience cooperation: You work in an international team with colleagues from e.g. Hungary, India, America and Asia.
- Conscientious coordination: You are the contact for our customers and third party suppliers concerning interfaces and you coordinate with project managers, our customers, our security officer and development partners.

What distinguishes you:

- Personality: strong communication skills, motivating, intercultural open-minded and flexible
- Working method: well organized, proactive and careful
- Experience: AUTOSAR software architecture and development
- Languages: very good English knowledge, German knowledge is a plus
- Education: Bsc/Msc in computer science or related field
